ASUCI Judicial Board

DATE: June 8, 2001

TO: Legislative Council

FROM: Judicial Board

Subject: ASUCI 2001-2002 Budget

The topic of ASUCI funded High School Outreach and Student Outreach Committee is suspect to the ASUCI Judicial Board.

The ASUCI Constitution, Article II Section B states:

> "All members of the Associated Students shall be entitled to any privileges of that membership which include but are not limited to…participating in all ASUCI activities, and benefiting from all ASUCI services and programs".

In accordance with this article, the funding of High School Outreach through ASUCI fees is deemed suspect. These activities and programs are not open to participation by the greater student body and thus do not directly benefit the Associated Students. The creditable argument that these programs benefit the facilitators is acknowledged, however the number of facilitators is not proportional to the budget allocation, nor to the greater student body. High School Outreach primarily benefits "potential students", not the currently enrolled students in which ASUCI is intended.

However, in consideration with eminent precedence, the ASUCI Judicial Board has found not to revoke funding to such programs, but has the following recommendations to the ASUCI Legislative Council.

ASUCI Judicial Board acknowledges that this topic is a vital concern to ASUCI, as well as the greater student body, and thus will continue to research for remedies to this problem. We concede that High School Outreach is an important aspect of ASUCI, and we continue to recommend ASUCI to be involved in such programs, however it is the funding of such programs that is in question. We ask of Legislative Council to investigate alternative avenues for funding.

Judicial Board requests updates on this progress.
